

# Behzodkhoja Nigmatkhojayev

.NET Developer

✉ nigmatxojayevbehzodxoja@gmail.com ☎ +998998200155 📍 Uzbekistan, Tashkent

## PROFILE

I am actively involved in technology and have 1 year of coding experience, plus 5 years of experience in sales, management. I am a web app developer specializing in web app development with excellent knowledge of software development methodologies, frameworks, and the Software Development Life Cycle (SDLC). I have experience in developing applications for various industries including Healthcare, Finance, and Educational sectors. I have excellent communication skills and the capability to professionally engage with diverse groups.

## EDUCATION

### Najot talim

July 2022 - May 2023

#### ● .NET (Bootcamp)

I have experience in C and Python programming languages and learned C# and web API development. My education has equipped me with a deep understanding of programming concepts and the ability to implement security measures such as RESTful services, HTTP, and JWT. I look forward to using these skills in future endeavors.

### Mohirdev

December 2022 - April 2023

#### ● .NET (Online private course)

Learned .NET and C# programming languages, Completed coursework in web API development, focusing on RESTful services, HTTP, and security measures like JWT

## WORK EXPERIENCE

### Food - Market

2018 - 2022

#### ● Director, Manager

Product sales, marketing

### Sareed Innovations

2023 - Now

#### ● .NET Developer

Web application development

## ACTIVITIES

### Sharpist - 2022

2022 - December

#### ● Volunteer

Microsoft Developers Community in Uzbekistan

## SKILLS

### SOFT SKILLS

**Communication, Leadership, Problem-Solving, Time management, Creativity, Teamwork, Attention to detail,**

## Continuous learning, Creativity Critical thinking

### HARD SKILLS

**C#, ASP.NET Core Web API, ASP.NET MVC, Entity Framework Core, Dapper, MSSQL Server, PostgreSQL, SQLServer, LINQ, REST, GraphQL, XUnit, Dapper Design Principles and Patterns**

---

### CERTIFICATIONS

2023

HackerRank C# (Basic) - Credential ID : A0B83A478599

---

### PROJECTS

FleetFlow

#### Team project

FleetFlow is an open-source delivery system project built on the .NET platform, aiming to provide a comprehensive solution with APIs, mobile applications, and web applications. As a dedicated .NET developer, I played a pivotal role in the challenging FleetFlow project, primarily focusing on the development and maintenance of the REST API using cutting-edge technologies. Alongside my development responsibilities, I also excelled in creating well-structured. By actively participating in the FleetFlow project, I had the opportunity to deepen my expertise in .NET Core, C#, and REST API development. This experience further amplified my ability to deliver robust and efficient software solutions, aligning with industry standards and best practices.

EduTrack

#### Team project

EduTrack is a CRM (Customer Relationship Management) system developed for a Learning Centre. Leveraging .NET 6 and Entity Framework, I spearheaded the development of an efficient solution to streamline customer interactions and data management. The system boasted a user-friendly interface, empowering effortless management of student information, enrollment, and scheduling processes. As a result, the CRM significantly improved the Learning Centre's operations, enhancing customer communication and optimizing administrative tasks. The successful implementation of EduTrack resulted in improved customer communication and enhanced operational efficiency for the Learning Centre, ultimately contributing to its overall success.

SalesPro

#### Team project

Kassa-Uz is an open-source point-of-sale (POS) system specifically designed for markets. It aims to cater to the unique needs of retail businesses by providing a comprehensive solution with advanced features not commonly found in other POS systems. The system offers an intuitive and user-friendly interface for effectively managing sales, inventory, and customer information. My contributions as a key developer in the Kassa-Uz project played a crucial role in delivering a market-focused POS system with enhanced capabilities.
